About Us

Allied Interest is a company founded upon a passion for engineering and innovation. We continually find ways to improve production and manufacturing processes through thorough investigation and understanding our clients' operational challenges.

With our diverse skillset and sophisticated partnerships we are positioned to drive significant increases in production capability by delivering simplified engineering solutions to complex production problems.

We specialise in the food manufacture, mining sector and all other large scale production facilities always going further to deliver performance based, profit driven results for our clients.

Our Mission

To drive significant increases in profitability and production efficiency for our clients leveraging our combined expertise, ingenuity in our innovation and industry leading work ethics.

Our Vision

To deliver innovative solutions throughout the food manufacture, mining sector and all large scale industrial production industry verticals from manpower and consulting expertise to plant and factory design.

YOUR TRUSTED PARTNER IN OPERATIONAL PERFORMANCE

COMPANY VALUES

Teamwork

Our team becomes part of our client's team. We seamlessly integrate and adopt the company culture, processes and values as an allied partner.

Efficiency

We are driven to create value for each client in all the work we undertake. Saving our clients time, money and delivering new solutions that are scalable and profitable.

Innovation

With our pedigree in engineering, we are always thinking of new ways to improve production, infrastructure and processes for companies to realise peak manufacturing potential.

Dedication

Our team is available for our clients 24/7 with emergency callouts and leading service level agreements that reflect our desire to deliver and provide the best possible service.

Our Planet

We carry out every task with the environment in mind. Providing solutions that both create new efficiencies within the plant whilst upholding and maintaining best practice environmental standards.

Meet the Directors

Jamen
Trousdel

Managing
Director

Mechanical
Specialist

Jamen began his career in civil construction in 2001 before transitioning to the asbestos and demolition industries in 2006, earning both an A-Class asbestos removal license and an open demolition license.

By 2008, he expanded his expertise into the petrochemical sector, working with industry leaders such as Caltex/Chevron, Shell Oil, and Mobil. His skillset further grew with roles in coal seam gas projects, collaborating on various sites with Arrow Energy, Santos, QGC, and Origin Energy.

In 2016, Jamen founded Allied Interest, specializing in facility maintenance, engineering support, emergency callouts, and wastewater treatment operations. As a mechanical and water treatment specialist, he has been instrumental in driving the company's growth, broadening its client base, and pioneering innovative solutions for customers.

With a passion for excellence and a focus on continuous improvement, Jamen is set to achieve his builder's license in 2025, further enhancing the company's service offerings.

Reach out to Jamen today to discover how Allied Interest can support your needs.

Email: jt@alliedinterest.com.au

Martin
Bursevski

Director

Electrical
Specialist

Martin began his electrical apprenticeship in 2009, focusing on the industrial sector with a contractor specializing in the food industry. Over the years, he contributed to new project implementations and ongoing maintenance for major international clients, including George Western Foods and Goodman Fielder.

In 2017, Martin transitioned to Turosi as a full-time maintenance electrician, where he developed valuable expertise in management and strategic planning—skills essential for leading a successful maintenance team. His passion for innovative maintenance solutions fuels his dedication to minimizing downtime and maximizing operational efficiency.

In 2020, Martin joined Allied Interest to lead the electrical division. His efforts have been instrumental in delivering seamless turnkey solutions for customers, driving innovation, and setting a strategic vision to optimize service delivery across the industry.

Call Martin today to discuss any electrical maintenance or shift coverage you need.

Meet the Team

Allied Interest is powered by an exceptional team of highly skilled professionals who are deeply passionate and knowledgeable about their work, making it an inspiring environment to thrive in.

Ashley Frank

Ashley Joined Allied Interest in January 2024. Ashley is responsible for managing a wide range of activities, including financial accounts, ISO compliance, and auditing processes, ensuring operational efficiency and adherence to industry standards. This role involves streamlining workflows, maintaining accurate records, and supporting organizational excellence through meticulous attention to detail and strategic oversight.

**Compliance
Manager**

Shane Snow

Shane joined Allied Interest in May 2025 as the Operations Manager, bringing with him a wealth of expertise in operational strategy, logistics coordination, and team leadership. With a strong background in process optimization and a passion for continuous improvement, Shane plays a pivotal role in driving operational efficiency and ensuring seamless day-to-day functions across the organization.

**Business
Development
Manager**

Tim Quill

Tim, a skilled fitter by trade, has taken on a dynamic role at Allied Interest, managing and quoting projects while overseeing shift work for mechanical operations.

His hands-on expertise and leadership ensure projects are executed efficiently and teams are well-coordinated to deliver exceptional results.

**Project
Operations
Manager**

Tyrone Milne

Tyrone, a talented boilermaker by trade, has stepped into a key role at Allied Interest, managing and quoting projects with precision and expertise.

His technical knowledge and project management skills ensure high-quality outcomes that meet client expectations.

**Project
Operations
Manager**

Our Services

Allied Interest understands the complexities of maintaining peak performance in your manufacturing facility. Unforeseen equipment failures can disrupt production schedules and cost valuable time and money. That's why we offer a comprehensive suite of services designed to keep your operation running smoothly and efficiently.

Our team handles all aspects of electrical and mechanical maintenance, from routine inspections and cleaning to repairs and upgrades. We utilise a proactive approach to prevent breakdowns before they occur, minimising downtime and maximising productivity. Beyond routine maintenance, the team can custom fabricate or machine parts to get your production line back up and running quickly. This in-house capability eliminates dependence on external vendors and minimises delays.

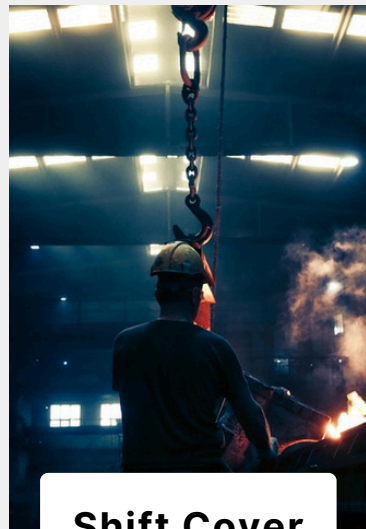

By partnering with Allied Interest, you gain a single source for all your industrial maintenance needs. We are committed to providing exceptional service and innovative solutions to keep your manufacturing running at peak efficiency.

Machining Services

Our Approach: With our unwavering commitment to the industrial sector, we are able to offer you highly skilled electricians who excel in fault finding, custom board installations and much more. Rest assured, we prioritize your facility's procedures and requirements, ensuring a seamless integration of our services. Our electrical staff comprehends the intricacies of operating in high production, performance-driven manufacturing and processing environments. Whether your facility is in full production mode or experiencing an outage, we take all necessary precautions to ensure a safe and efficient working environment.

Electrical

Unforeseen Failures, Unforeseen Costs:

Don't let electrical breakdowns throw a wrench in your production schedule. Allied Interest's qualified electricians champion a proactive maintenance strategy. This approach minimises downtime and lost production by focusing on preventative measures like regular inspections, meticulous cleaning procedures, and other essential servicing operations. By ensuring your equipment functions optimally, we extend its lifespan and safeguard your bottom line.

Beyond Band-Aids: A Holistic Approach:

Our expertise goes beyond simply keeping the lights on. We collaborate with you to develop a comprehensive plan that significantly reduces preventable breakdowns. This plan prioritises crucial safety precautions, ultimately leading to a decrease in overall maintenance costs. This proactive approach translates to substantial cost savings for you and a safer work environment for your employees.

Reactive vs. Proactive:

Addressing equipment failures during production is a recipe for disruption and expense. Reactive breakdown maintenance requires emergency repairs and halts operations, impacting your profitability. By implementing a focus on preventative maintenance with Allied Interest, you minimise these costly disruptions and maximise production efficiency.

Mechanical

Our Approach

Allied Interest provides a wide range of mechanical services that cover every sector of your plant to ensure top performance and reliability. Our skilled mechanics seamlessly integrate with your processes and procedures, collaborating closely with your engineering, planning, and maintenance departments to help identify and resolve issues, reduce downtime, and improve the efficiency of your operations. We have experience in a variety of processes and applications and can bring our technical expertise to your plant.

Our Promise

Extended Lifespan:

Allied Interest's mechanical maintenance goes beyond simply fixing breakdowns. Our focus is on ensuring the enduring efficiency, longevity, and safety of your industrial machinery, factory equipment, and production plants.

Planning for Smooth Production:

Our expert technicians are not just repairmen – they're strategists. We can implement a comprehensive maintenance plan that anticipates and minimises failures and breakdowns before they occur. This plan incorporates preventative measures, regular inspections, and swift corrective actions when required. Our goal is to maximise uptime and minimise downtime, keeping your production lines humming.

Confidence Through Expertise:

Safety is our top priority. Our team comprises of certified professionals who meticulously handle routine mechanical maintenance tasks according to a well-defined plan. This ensures your equipment receives the expert care it needs to function at peak performance, giving you peace of mind and optimal production.

Beyond Maintenance: A Tailored Solution:

We don't just maintain – we optimise. Our expertise extends to identifying opportunities to streamline your mechanical maintenance schedules, ensuring maximum efficiency. In some cases, we can even fabricate specific components or machinery, saving you both time and money – an advantage you won't find everywhere.

Shift Cover

At Allied Interest, we understand the critical importance of maintaining uninterrupted operations in factory settings. That's why we offer comprehensive electrical and mechanical standby maintenance shift coverage services to ensure that your factory equipment remains operational around the clock.

Why Choose Allied Interest for Standby Maintenance Shift Coverage?

Expert Technicians: Our team consists of highly skilled and experienced technicians who specialize in both electrical and mechanical systems. They are equipped with the knowledge and expertise to quickly diagnose and address any issues that may arise, minimizing downtime and keeping your factory running smoothly.

24/7 Availability: We offer round-the-clock standby maintenance shift coverage to ensure that your factory is always protected, including shutdown hours and weekends. Our technicians are available at a moment's notice to respond to any emergencies or maintenance needs that may arise, providing you with the peace of mind knowing that help is always just a phone call away.

Comprehensive Coverage: Whether it's electrical malfunctions, mechanical breakdowns, or any other maintenance issue, Allied Interest has you covered. Our standby maintenance services encompass a wide range of equipment and systems, including HVAC systems, conveyor belts, electrical panels, motors, and more.

Proactive Maintenance: In addition to addressing emergencies, we also offer proactive maintenance services to help prevent issues before they occur. Our technicians conduct regular inspections, testing, and preventive maintenance tasks to identify potential problems early on and keep your equipment in optimal working condition.

Customized Solutions: We understand that every factory has unique maintenance needs. That's why we offer customized maintenance plans tailored to suit your specific requirements and budget. Whether you need standby coverage for specific shifts, weekends, or holidays, we can design a plan that works for you.

Rapid Response Time: When you partner with Allied Interest, you can trust that help is always just a phone call away. Our technicians are stationed strategically to ensure rapid response times to emergencies, minimising downtime and maximizing productivity for your factory operations.

24/7

Professional

Cover

Water Treatment

Our Approach: Production water is inevitably accompanied by wastewater, especially in industrial and commercial settings where water consumption is significantly higher, resulting in equally substantial amounts of wastewater. Numerous essential daily operations such as cleaning, washing, irrigation, cooling, and heating heavily depend on water.

Allied Interest possesses the necessary expertise to cater to various industrial sectors, offering comprehensive water and wastewater treatment solutions. Our aim is to ensure that your facility adheres to environmental regulations while optimizing processes for optimal performance.

Factory Effluent: We possess expertise in managing various forms of factory effluent, ranging from food manufacturing biproducts to oils and textile waste fluids. Our approach to handling effluent strictly adheres to the rigorous standards set by Australia, ensuring that we maintain the highest level of eco-friendly practices.

Industrial Wastewater: Allied Interest specializes in the management of industrial wastewater, offering services such as bar screening, aeration, clarification, pH testing, and effluent extraction. Our expertise extends to providing tailored solutions and recommendations for a wide range of industries.

Commercial Kitchens: Our team is adept at effectively managing and disposing of liquid waste from commercial kitchens and restaurants, including grease traps, detergents, and residues from industrial cleaning products. This ensures that the food production environment complies with both Work, Health & Safety and environmental regulations.

Purification Systems: Allied Interest collaborates with various wastewater purification systems, employing cutting-edge technology and implementing industry-leading techniques. Our aim is to transform bi-product contaminated fluids into pure H₂O, while ensuring the extraction and disposal of contaminants in an environmentally friendly manner.

Food Production: With our roots in the food industry and large-scale manufacturing sectors, we have established a strong reputation. As pioneers in the field, we excel in providing comprehensive wastewater management solutions for industrial food production. Our expertise spans from system design to the efficient removal and safe disposal of contaminants.

Factory Floor: Allied Interest possesses extensive expertise in effectively managing the inflow and outflow of fluids within large-scale industrial production facilities. Our team is dedicated to delivering customized solutions at every stage of the production process, guaranteeing optimal efficiency while strictly adhering to industry standards and regulations.

Repairs: Expertise in handling various piping materials and fluids, ensuring seamless repairs that cause minimal disruption to the production process. Our services go beyond mere repairs as we also provide valuable recommendations for innovative solutions to enhance efficiency in both input and output aspects.

24/7 Emergency Services: Allied Interest is a company founded on unwavering commitment and a strong determination to exceed our clients' expectations. Our aim is to surpass even the highest standards in delivering exceptional service. We prioritize our clients' needs by offering round-the-clock emergency call outs, ensuring that we are always available during critical moments when they require our assistance the most.

Dangerous Goods

Protecting Your Property and People

At Allied Interest, safety is paramount. We specialise in comprehensive solutions for both asbestos removal and hazardous materials transportation. Our team of highly trained and certified professionals is dedicated to providing exceptional service with a focus on safety, compliance, and minimal disruption to your operations.

Asbestos Removal Expertise

We handle all aspects of commercial asbestos removal, from initial testing and assessment to safe removal and disposal. Our state-of-the-art equipment and meticulous procedures ensure a thorough and risk-free process.

Focus on Safety and Compliance

Whether you require asbestos removal from ceilings, walls, flooring, or elsewhere, our priority is your safety. We strictly adhere to industry regulations and best practices to minimise risk and ensure a healthy environment for your occupants.

Seamless Hazardous Materials Transportation

We understand the complexities of transporting hazardous materials. Our team offers extensive experience, specialised equipment, and unwavering commitment to compliance. From proper packaging and labeling to safe transport, we ensure your materials reach their destination securely and on time.

Customised Solutions for Every Need

Every project is unique. We offer customised solutions tailored to your specific requirements, ensuring a smooth and efficient process. No matter the size or complexity of your asbestos removal or hazardous materials transportation needs, Allied Interest is here to help.

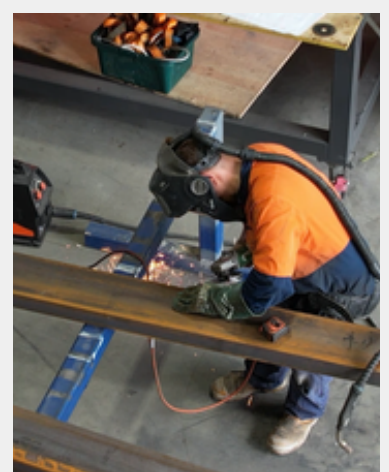

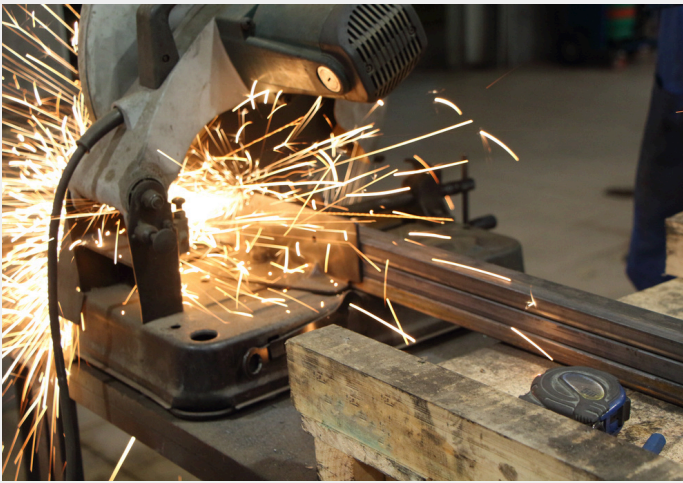

Manufacturing

We manufacture and deliver high-quality products tailored to your specific needs. From factories and mining operations to irrigation systems, water treatment plants, power generation facilities, and plumbing projects, we offer a comprehensive range of solutions across various industries.

We have an extensive range of rapid prototyping services and technologies available to support manufacturers and designers in the efficient and cost-effective development and evaluation of new products with minimised risk. By leveraging well-established rapid prototyping technologies like 3D printing, we have the ability to transform your concept or design into a physical product within a short timeframe.

Our team is highly knowledgeable in 3D printing and will assist you in determining the most suitable rapid prototyping service for your specific needs. Whether you require a plastic or metal prototype to assess form, fit, and function, or if you need a starting point for any of our subsequent manufacturing services, we have you covered.

No two manufacturing facilities are identical. That's why we take a customised approach, tailoring our solutions to your specific needs and equipment. Whether you're a high-volume production plant or a specialised manufacturer, we have the expertise to elevate your operations.

Wet Hire

Allied Interest is proud to offer a diverse fleet of equipment for wet and dry hire, providing flexible solutions to meet the needs of your projects. Our high-quality fleet includes:

- 20T Franna Crane: Ideal for lifting and moving heavy materials with precision and ease, perfect for construction and industrial projects.
- Generator: Reliable and high-capacity power generation to ensure your site operates smoothly, even in remote locations.
- Truck: Versatile and robust, suited for transporting equipment, materials, or debris efficiently.
- Excavator: Powerful and adaptable for earthmoving, trenching, or site preparation tasks, capable of handling tough terrain.

We ensure all our equipment is meticulously maintained and site-ready, minimizing downtime and maximizing efficiency. With the option of wet hire, you can have our experienced operators manage the machinery for you, ensuring safety and optimal performance. Alternatively, our dry hire option allows you to take full control of the equipment, offering flexibility to suit your project preferences.

At Allied Interest, we are committed to providing exceptional service, quality equipment, and support tailored to your project's requirements. Reach out to us today to discuss your equipment hire needs and let us help you get the job done right!

Process Engineering

Optimising Your Production from Concept to Reality

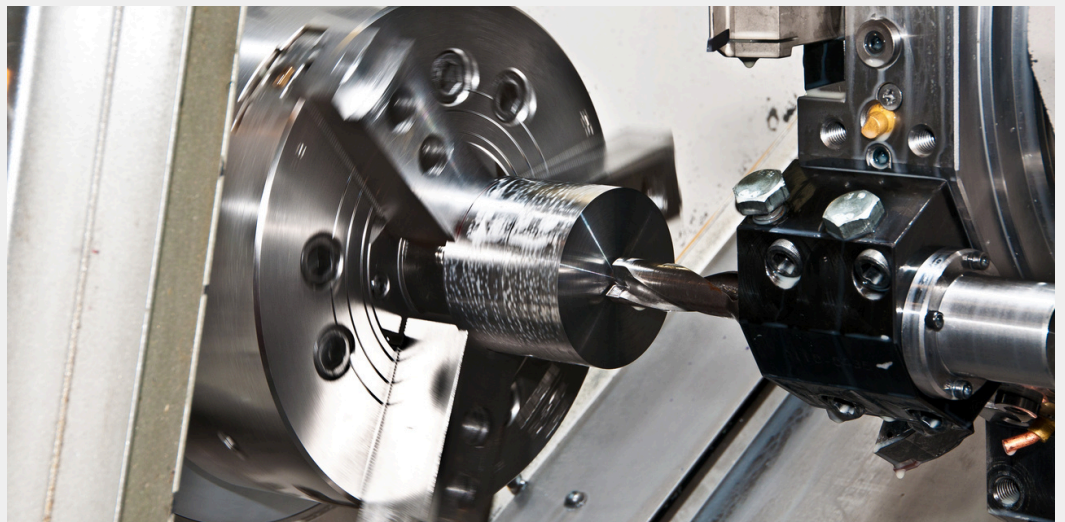

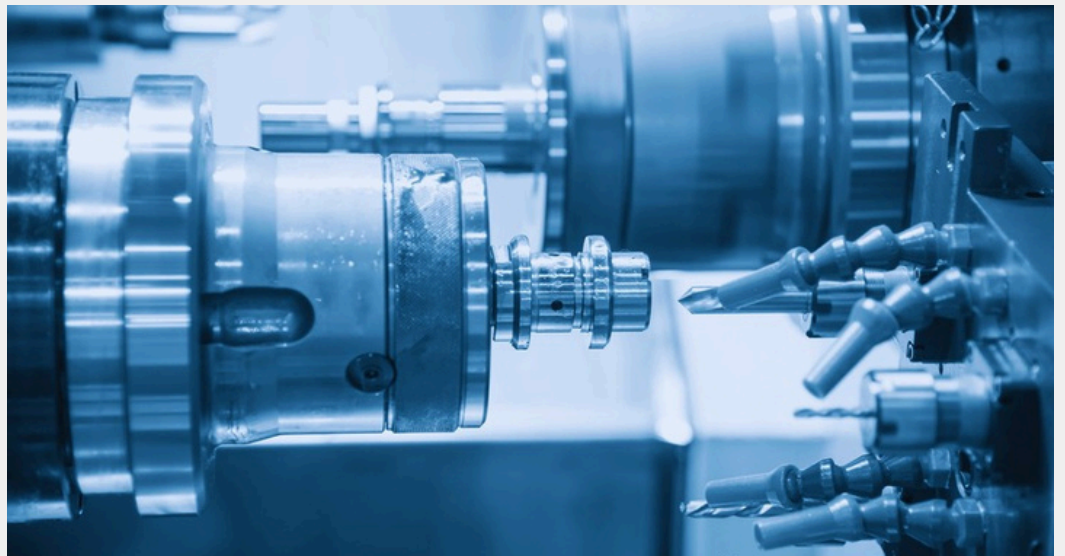

Allied Interest delivers customised solutions for various industries, including factories, mining, and power plants. Our expertise in process engineering ensures seamless project execution, transforming your vision into an optimised production plan.

Our Approach:

- In-depth Analysis: Our process engineers meticulously analyse raw materials, equipment capabilities, and desired outcomes.
- Minimised Waste, Maximised Output: We design workflows that minimise waste, maximise output, and meet stringent quality standards.
- Advanced Software Simulation: We utilise state-of-the-art software to simulate and optimise processes before implementation, guaranteeing a smooth transition.

Your Needs, Our Focus:

Whether you require new process development, existing process improvement, or integration with current systems, our engineers bridge the gap between your requirements and a successful outcome.

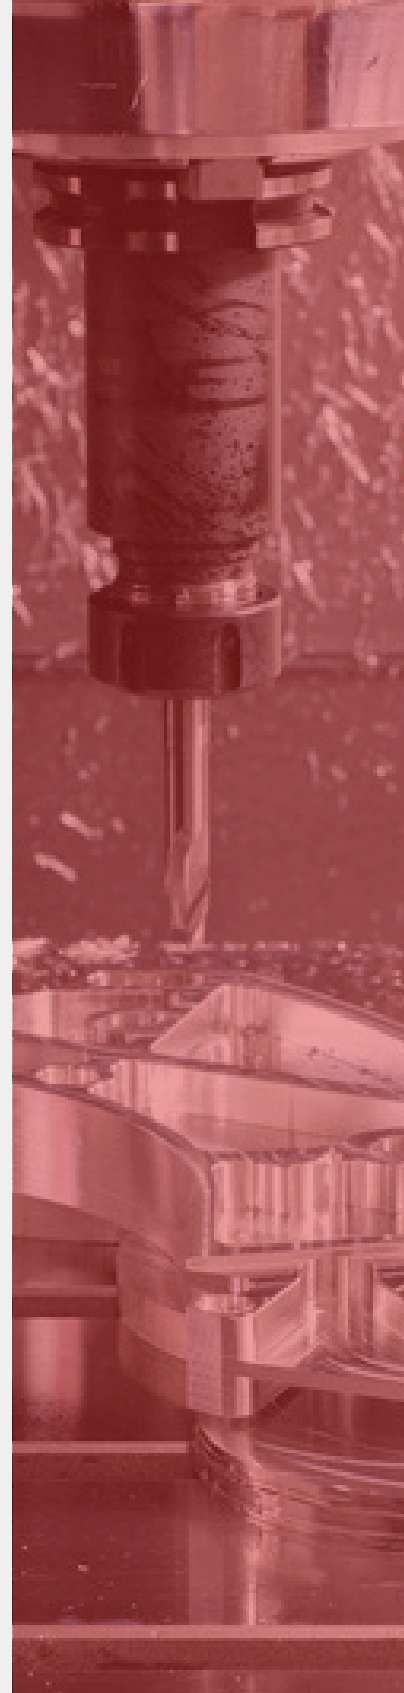

Machining Services

CNC Machine: Irrespective of whether you need individual prototypes or large-scale mass production, Allied Interests is a well-known authority in precise CNC machining, providing intricate finished parts and components. Alongside primary machining, our CNC manufacturing proficiency covers secondary operations such as drilling, tapping, and milling on both machined parts and those produced through alternative methods.

Transform your designs into actuality with our exceptional CNC machining services. Unparalleled precision and efficiency are assured. Our skilled machinists and engineers work closely together to convert your CAD drawings into exceptional finished parts. We employ advanced CNC machines and state-of-the-art tooling to handle even the most intricate designs, ensuring dimensional accuracy and repeatability across all components.

From prototype development to high-volume production runs, we offer a comprehensive range of machining services tailored to your project's specific requirements. By prioritizing process optimization and minimizing material waste, we deliver cost-effective solutions that surpass expectations. Allow our machining expertise to bring your vision to life in a tangible form.

3D Printing: We offer a wide array of rapid prototyping services and technologies to aid manufacturers and designers in the efficient and cost-effective development and evaluation of new products with reduced risk. Utilizing established rapid prototyping methods such as 3D printing, we can quickly turn your idea or design into a tangible product. Our experienced team is well-versed in 3D printing and can help you choose the most appropriate rapid prototyping service for your specific requirements. Whether you need a plastic or metal prototype to test form, fit, and function, or if you are looking for a starting point for our other manufacturing services, we have the solution for you.

Projects

From Vision to Reality: Optimising Your Industrial Operations

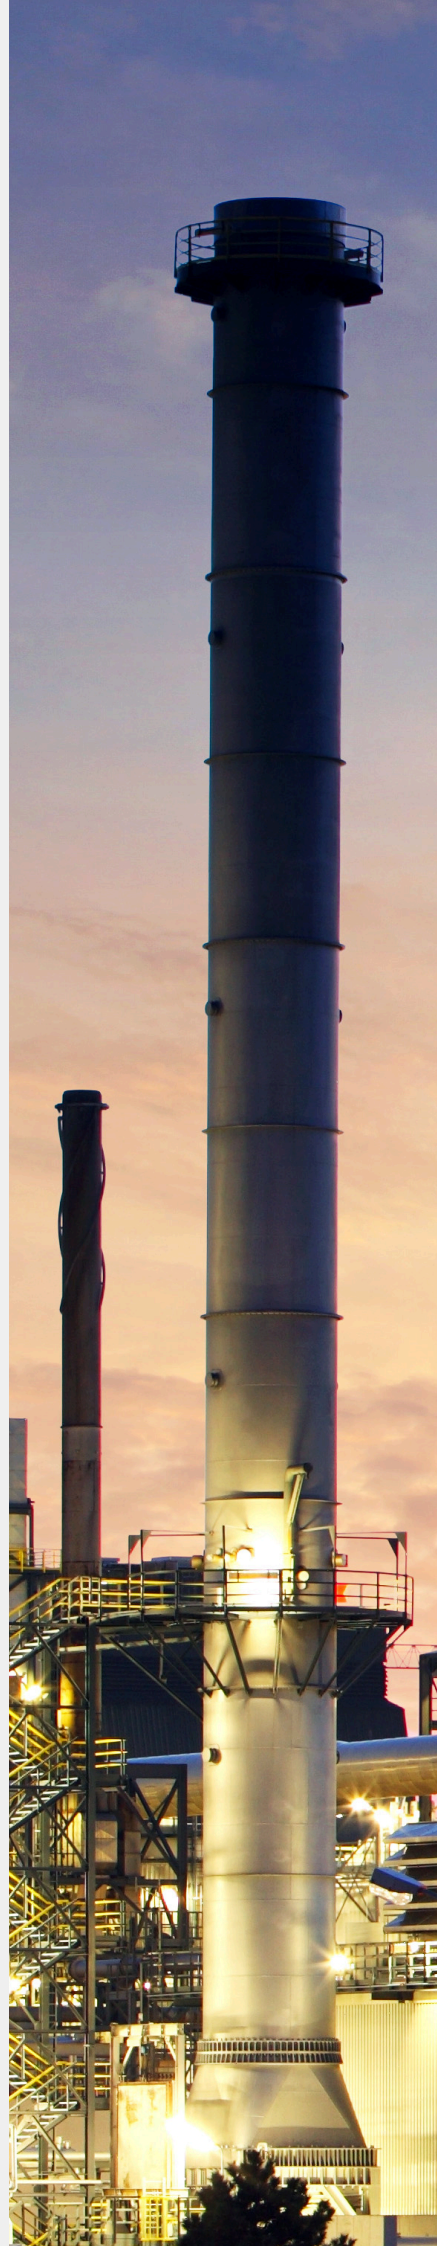

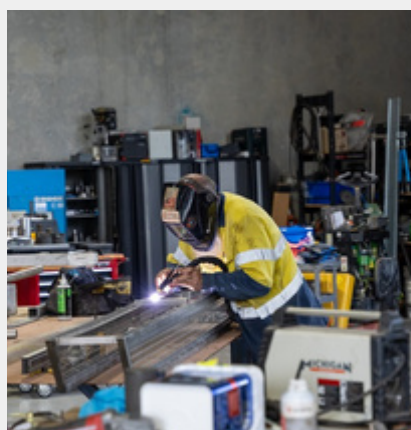

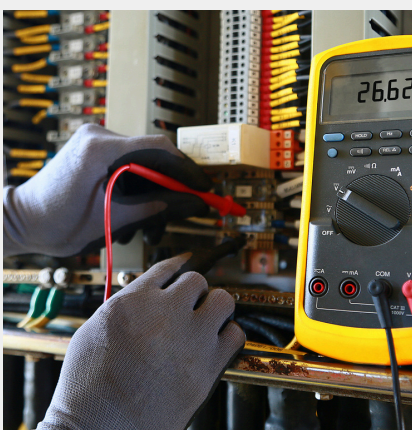

Allied Interest isn't just about process engineering; we're your comprehensive partner for large-scale industrial projects. Our expertise and capabilities encompass every stage, from conception to completion, ensuring your production goals are achieved.

Scaling Up Your Success:

- **Project Expertise:** We handle projects of any size, whether you're expanding, enhancing, or building a new facility entirely.
- **Personalised Approach:** We provide customised advice and solutions tailored to your organisation's unique objectives.

Our Services:

- **Custom Machinery & Upgrades:** Our in-house team designs and builds bespoke machinery or upgrades existing equipment to optimise your production line.
- **Automation Solutions:** We integrate cutting-edge automation technology to streamline workflows and improve efficiency.
- **Electrical & Mechanical Installations:** Our skilled professionals handle all electrical and mechanical installations with precision and safety.
- **Asbestos Removal & Demolition:** We ensure safe and compliant handling of hazardous materials for a clean slate before construction begins.

Environmental Systems

COMMITMENT

We are committed to undertaking and completing projects using every practical effort available to minimise adverse environmental impacts, whilst maintaining a high standard of quality with the Environmental Protection Act and AS/ NZS ISO 14001 Environmental Management Systems.

VISION

Allied Interest recognises environmental management as among its highest priorities and as a key advocate to sustainable development.

OBJECTIVES

To establish, maintain and continue to improve policies, programs and environmental performance, taking into account technical developments, consumer needs and community expectations, whilst ensuring compliance with legislative requirements and current industry standards.

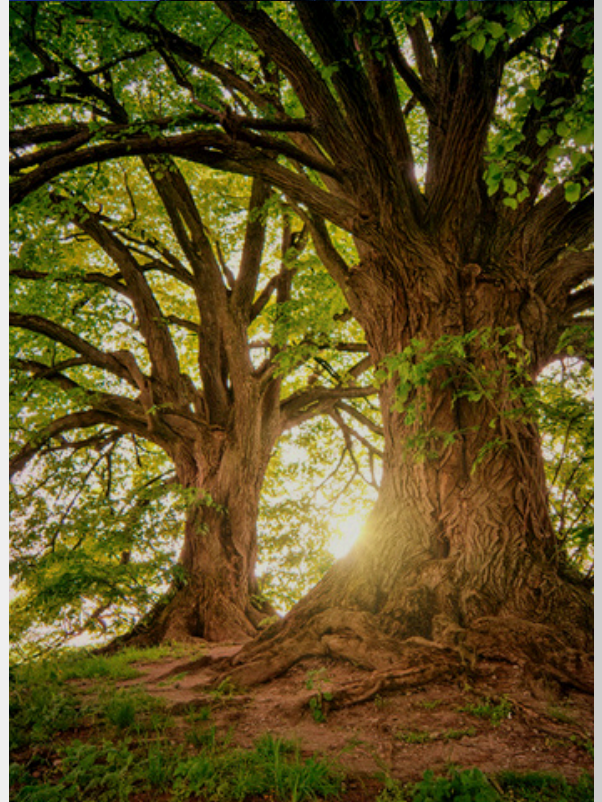

Our Environmental Commitment

An essential aspect of this environmental management system is to educate, train and motivate employees to conduct their activities in an environmentally responsible manner. To encourage openness and communication with employees and the public, responding to their concerns about potential hazards and impacts of operations, products, wastes or services.

Allied Interest makes a commitment to:

- Assess environmental impacts before starting a project in order to minimise the adverse environmental impacts whilst promoting rehabilitation and re-growth practices and encouraging the reduction of pollution and dust emissions.
- Promote the adoption of these principles by sub-contractors, encouraging and, where appropriate, requiring improvements in their practices to make them consistent with our policies and procedures, and to encourage the wider adoption of these principles by suppliers.
- Develop and maintain, where significant hazards exist, emergency preparedness plans in conjunction with the emergency services, relevant authorities, and the local community.
- Measuring and reviewing environmental performance, objectives, and targets; and conduct regular environmental audits and assessments of compliance with company and legal requirements.

ISO Compliance

In 2024, Allied Interest Pty Ltd proudly achieved compliance with ISO 9001 (Quality Management), ISO 14001 (Environmental Management), and ISO 45001 (Occupational Health and Safety) standards.

This milestone reflects our unwavering commitment to excellence, sustainability, and the safety of our team and clients.

By implementing rigorous systems and processes across all operations, we have reinforced our dedication to delivering high-quality services, minimizing environmental impact, and ensuring a safe and healthy workplace.

These certifications are a testament to Allied Interest's continued focus on innovation, accountability, and industry leadership.

Allied Interest is dedicated to maintaining the highest standards and maintaining our ISO Certifications

ISO 9001 Quality Management is a globally recognized standard that ensures consistent delivery of high-quality products and services. It focuses on improving efficiency, enhancing customer satisfaction, and fostering continuous improvement in business processes.

ISO 14001 Environmental Management is a globally recognized standard that helps organizations manage their environmental impact. It focuses on promoting sustainability, reducing waste, and ensuring compliance with environmental regulations through continuous improvement.

ISO 45001 Occupational Health and Safety is an international standard that ensures organizations create safe and healthy workplaces. It focuses on reducing workplace risks, preventing accidents, and improving overall employee well-being through proactive safety management.
